### **DETAILED ACTION**

1. This communication is in response to Applicant's amendment filed on June 27, 2006. Claims 1-10 are pending in this application.

#### ***Allowable Subject Matter***

2. The following is a statement of reasons for the indication of allowable subject matter:

3. The prior art of record (Case et al. US Pat. No. 5,734,890) teaches the use of a decision tool and method for analyzing a decision by allowing a decision table data collected from a plurality of decision makers to be compared, and generating a prioritized list of areas where actions can have an impact in the mind of decision makers. The prior art of record fails to teach a computer implemented method for optimizing strategic options designed to solve a selected mission prior to implementation of any option, the computer implemented method comprising, desired outcome means, in communication with a memory and processor, for processing data relating to subject specific desired outcomes for at least one predetermined customer set, the desired outcomes having predetermined prioritized ratings, each of said desired outcomes defining a benefit of value, the desired outcomes free from any solution or specification, each of said desired outcomes remaining stable over time, and predictive metric means, in communication with the memory and processor, for processing data

relating to predictive metrics which predict satisfaction of the desired outcomes, each of the predictive metrics being defined as a parameter that can be measured and controlled for satisfying at least one desired outcome, defining strategic options, each of the defined strategic options designed to satisfy at least one desired outcome, and comparing each of the user defined strategic options with a user defined baseline strategic option to determine which of the user defined strategic options best predict satisfaction of each of the customer desired outcomes. For these reasons claims 1, 9, and 10 are deemed to be allowable over the prior art of record, and claims 2-8 are allowable by dependency.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.
